

William S. Kisaalita

williamk@uga.edu

Athens, Georgia, USA

Professor

University of Georgia

What most **excites or inspires** me about my LSIL related work is: the potential to make impactful nutritional and financial differences in millions of households in the Sudano-Sahelian belt.

What keeps me **awake** at night about my research is: scaling to millions of beneficiaries.

My main area of **interest** beyond my LSIL related work is: empowering the poor through sustainable technology-based solutions.

Salibo Some

salibo@asudec.org

Ouagadougou, Burkina Faso

Associate Professor and Director,
Africa's Sustainable Development
Council (ASUDEEC)

What most **excites or inspires** me about my LSIL related work is: the development of the YaiKuula as a multipurpose low cost environmentally friendly refrigerator for rural farmers and the use of fly maggots for poultry feed formulation. LSIL provides me with an opportunity to strengthen ASUDEEC capacities.

My main area of **interest** beyond my LSIL related work is: empowering the least fortunate through improving guinea fowl production as a sustainable source of income and animal source protein for smallholders.

Aimé J. Nianogo

anianogo@gmail.com

Ouagadougou, Burkina Faso

Professor

Nazi Boni University

What most **excites or inspires** me about my LSIL related work is: the small innovations that have a true potential to really boost production.

What keeps me **awake** at night about my research is: demonstrating to the youth that there are numerous viable opportunities in the livestock and poultry industry in West Africa.

My main area of **interest** beyond my LSIL related work is: to help transform

Alex Kojo Anderson

fianko@uga.edu

Athens, Georgia, USA

Professor

University of Georgia

What most **excites or inspires** me about my LSIL related work is: the potential to make impactful changes in the nutritional and health status, as well as financial situation among millions of households in the Sudano-Sahelian belt.

What keeps me **awake** at night about my research is: finding effective ways of improving the nutrition, particularly protein food sources, and health of those living in poverty.

My main area of **interest** beyond my LSIL related work is: to create a sustainable means for households living in poverty access and consume nutritious foods of high protein quality that support good health.

Salimata POUSGA

pousgasalimata@yahoo.fr

Bobo-Dioulasso, Burkina Faso

Associate Professor
Nazi BONI University (ex. Polytechnic
University of Bobo-Dioulasso

What most **excites or inspires** me about my LSIL related work is:

- the potential to help smallholder poultry farmer with a smart technology in managing the eggs before brooding in hot climate.
- the potential to help farmers with low cost sustainable protein feed for poultry.

What keeps me **awake** at night about my research is: realistic and sustainable balanced poultry feed formulation for poor poultry farmers.

My main area of **interest** beyond my LSIL related work is: empowering the poor farmers through sustainable animal feed and technology-based solutions.
